

What is the Learning Path?

The LeapFrog Learning Path is a free online tool that lets you, the parent, see your child's learning progress with LeapFrog's products.

For the first time ever, you can get regular updates on the skills and activities your child is engaging with during play.

These updates provide insight that empowers you to help out in areas where your child is in need of some help, celebrate as your child progresses along the Learning Path and map out the next steps in your child's LeapFrog learning. All you need to get started is a LeapFrog Parent account, free of charge.

LeapFrog's Learning Path makes it easy to become an active part of your child's learning.
